

Task List

Complete To-do's

- Add proper viewport meta tag to make page properly display on mobile devices.
- implement responsive navigation that matches your IA design
- put this nav on every page
- Add images to your repository and update this code so the carousel has proper slides.
- Add the proper "row" and "col" classes to make this display work the way it should.
- This section should have columns that are 4 units wide at size "md" and above, but 6 units wide at size "sm" and below.
- User flex-box to replace the centered paragraph with copyright and date with 2 paragraphs: the first paragraph is left aligned and contains copyright and date
- and one that is right aligned and contains your name.
- Put the footer on every page.

Complete phase two of project
